PREFACE

The present is the Twenty-fourth Annual Report on Vital Statistics to be issued by the Dominion Bureau of Statistics on data obtained under arrangement with Provincial Registration Departments. It is the nineteenth report covering all provinces.

Until recently, vital statistics were all classified by place of occurrence. In 1944, however, the classification of births and deaths by place of residence was begun, births being classified by the place of residence of the mother. A number of special tabulations by place of residence have been made for a few years prior to 1944.

The First, Second and Third Annual Reports contain a full account of the origin and purpose of the agreement between the Dominion and the provinces for the production of vital statistics, together with a sketch of the earlier development of these statistics in Canada. Registration of births, deaths and marriages is carried out by the provincial authorities, each province having passed an act making registration compulsory and prescribing that certain items of information be obtained on a uniform basis. Transcripts of the certificates are forwarded to the Dominion Bureau of Statistics and from these the Annual Reports for Canada are compiled. For the year 1944, in addition to the preparation of tables for the present volume, the Bureau of Statistics issued quarterly reports and a preliminary annual report, and supplied to all provinces the compilations required for their respective reports.

As in past years, the statistics of births, deaths and marriages among the Indian population of the provinces are included in the comparative and analytical tables and in the general summary tables of the present report. They are also given separately in Appendix I. The Vital Statistics of Yukon and the Northwest Territories are not included in the comparative and analytical tables or in the general summary tables, but a summary thereof appears as Appendix II.

In tables classified by "rural" and "urban" the term "Urban" includes cities, towns and villages of 1,000 population and over, "Rural" the remaining parts. The classification of cities, towns and villages is according to the census of 1941.

The tables dealing with deaths by cause have been compiled in accordance with the Fifth Decennial Revision recommended by the International Commission for classification of Diseases and Causes of Death, at Paris, France, in October, 1938. Appendix III lists by provinces the number of deaths from all causes and from certain important causes according to the presence or absence of medical attendance. Appendix IV presents the number of cases of certain notifiable diseases reported in the provinces of Canada during each month of 1944.

The present volume is issued without text, in this manner resembling previous Annual Reports commencing with the Ninth. In order, however, that the most essential figures for rates and comparisons in time shall be available to the reader, twenty-eight tables containing such figures have been included in the report. They comprise the first section, under the title "Comparative and Analytical Tables". The Canada Year Book contains a textual summary and analysis for 1944 in comparison with previous years. Copies of this textual summary may be obtained upon application to the Vital Statistics Branch, Dominion Bureau of Statistics.

The collection of the data and the preparation of the report were undertaken by the Vital Statistics Branch in co-operation with the Provincial Vital Statistics Offices, under the direction of J. T. Marshall, Chief of the Vital Statistics Branch.

HERBERT MARSHALL,
Dominion Statistician.

PRÉFACE

Le présent rapport annuel sur les Statistiques Vitales du Canada est le vingt-quatrième de la série que publie le Bureau Fédéral de la Statistique sur les données obtenues en vertu d'ententes avec les départements provinciaux. C'est le dix-neuvième rapport couvrant toutes les provinces du Canada.

Jusqu'à dernièrement, les statistiques vitales étaient toutes classifiées d'après le lieu de survenance. En 1944, cependant, a commencé la classification des naissances et des décès d'après le lieu de résidence, les naissances étant classifiées d'après le lieu de résidence de la mère. Un certain nombre de tableaux spéciaux d'après le lieu de résidence ont été dressés pour quelques années antérieures à 1944.

Le premier, le deuxième et le troisième rapports annuels donnent un aperçu complet de l'origine et du but de cette entente entre le Dominion et les provinces pour la compilation des statistiques vitales et décrivent les progrès de ces statistiques au Canada. L'enregistrement des naissances, décès et mariages est fait par les autorités provinciales, chaque province ayant décrété l'enregistrement obligatoire suivant des formules tendant à établir certaines informations sur des bases uniformes. Des copies de ces actes sont envoyées au Bureau Fédéral de la Statistique et leur compilation sert de base au rapport annuel. En 1944 le Bureau Fédéral de la Statistique, outre la préparation de ces tableaux, a publié des bulletins trimestriels et un rapport annuel préliminaire. Il a de plus fourni à toutes les provinces les compilations dont elles avaient besoin pour leurs rapports respectifs.

Comme par le passé, on a fait entrer dans les tableaux comparatifs et analytiques et dans les tableaux sommaires généraux du présent rapport les naissances, décès et mariages de la population indienne des provinces. Ils sont aussi donnés séparément dans l'appendice I. Les statistiques vitales du Yukon et des Territoires du Nord-Ouest ne sont pas comprises dans les tableaux comparatifs et analytiques ou dans les tableaux sommaires généraux, mais il en paraît un sommaire comme appendice II.

Dans les tableaux classifiés selon les régions "rurales" et "urbaines" le terme "urbaines" signifie les cités, villes et villages de 1,000 habitants et plus et le terme "rurales" les régions qui restent. La classification des cités, villes et villages est basée sur le recensement de 1941.

Les tableaux portant sur les décès selon la cause ont été dressés conformément à la cinquième revision décennale faite à Paris, France, en octobre 1938 et recommandée par la Commission internationale pour la Classification des Décès et des Causes de Décès. L'appendice III donne par province le nombre de décès par toutes causes et par certaines causes importantes, avec ou sans l'assistance médicale. L'appendice IV présente le nombre de cas de certaines maladies déclarables constatés dans les provinces canadiennes, chaque mois de 1944.

Le présent volume ne contient pas de texte, étant ainsi similaire aux rapports annuels antérieurs, commençant avec le neuvième rapport. Cependant, pour que le lecteur ait toujours les chiffres les plus essentiels des taux et des comparaisons de temps ces chiffres ont été incorporés en vingt-huit tableaux formant la première section et appelés "Tableaux comparatifs et analytiques". L'Annuaire du Canada donne un résumé analytique de 1944 comparativement aux années précédentes. Des copies de ce résumé peuvent être obtenues sur demande à la Branche des Statistiques Vitales, Bureau Fédéral de la Statistique.

Le recueil des données ainsi que la préparation du présent rapport ont été faits à la Branche des Statistiques Vitales, en collaboration avec les bureaux provinciaux des statistiques vitales sous la direction de J. T. Marshall, chef de la Branche des Statistiques Vitales.

La traduction a été faite par la Branche de Traduction du Bureau: Emile Boucher, chef.

Statisticien du Dominion.

COMPARATIVE AND ANALYTICAL TABLES

TABLEAUX COMPARATIFS ET ANALYTIQUES

NOTES

Tables of births, deaths and marriages for Yukon and the Northwest Territories are given in Appendix II.

Populations for 1921, 1931 and 1941 are census figures, those for Manitoba, Saskatchewan and Alberta for 1926 and 1936 are based on the census of the Prairie Provinces and remaining figures are estimates to the nearest thousand.

Divisions in British Columbia are census divisions and the correspondence of their subdivisions with those in Census publications is as follows: $5_A = 5a$, b, c, d; $5_B = 5e$, f; $6_A = 6a$, b, c; $6_B = 6d$, e, f; $8_A = 8a$, b, c, d; $8_B = 8e$, f, g; $9_A = 9a$; $9_B = 9b$; $9_C = 9c$, d, e; $9_D = 9f$; $10_A = 10a$; $10_B = 10b$; $10_C = 10c$, d.

"Urban" includes cities, towns and villages of 1,000 population and over, "Rural" the remaining parts. The classification of cities, towns and villages is according to the Census of 1941.

Les tableaux des naissances, des décès et des mariages pour le Yukon et les Territoires du Nord-Ouest sont donnés dans l'appendice II.

Les chiffres de la population en 1921, 1931 et 1941 sont ceux du recensement; la population du Manitoba, de la Saskatchewan et de l'Alberta est celle du recensement des Provinces des Prairies de 1926 et 1936; les autres chiffres sont des estimations au millier le plus près.

Les divisions en Colombie Britannique sont les divisions de recensement et leurs subdivisions correspondent comme suit aux subdivisions figurant dans les publications du recensement: $5_A = 5a$, b, c, d; $5_B = 5e$, f; $6_A = 6a$, b, c; $6_B = 6d$, e, f; $8_A = 8a$, b, c, d; $8_B = 8e$, f, g; $9_A = 9a$; $9_B = 9b$; $9_C = 9c$, d, e; $9_D = 9f$; $10_A = 10a$; $10_B = 10b$; $10_C = 10c$, d.

"Régions urbaines" comprennent les cités, villes et villages ayant une population de 1,000 âmes et au-dessus, le reste est inclus avec "Régions rurales". La classification des cités, villes et villages est selon le recensement de 1941.

NOTE:—There is some variation in the comparison factor between figures for the years 1936 to 1940 and the figures for 1941 to 1944 due to the disturbance in distribution caused by changes in class and re-arrangement of titles recommended in the Fifth Revision of the International List of Causes of Death.—Il y a une certaine variation dans le facteur de comparaison entre les chiffres des années 1936 à 1940 et ceux de 1941 à 1944. Cette variation est due au remaniement de la distribution nécessité par les changements dans les catégories et le réarrangement des titres recommandés dans la Cinquième Revision de la Liste Internationale des Causes de Décès.

(1) Including paratyphoid—Y compris paratyphoïde.

(2) Not segregated prior to 1941, previously included under rubrics 170, 171, 176, 186 and 188—Non séparé antérieurement à 1941 et compris sous les rubriques 170, 171, 176, 186 et 188.

NOTE:—There is some variation in the comparison factor between figures for the years 1936 to 1940 and the figures for 1941 to 1944 due to the disturbance in distribution caused by changes in class and re-arrangement of titles recommended in the Fifth Revision of the International List of Causes of Death.—Il y a une certaine variation dans le facteur de comparaison entre les chiffres des années 1936 à 1940 et ceux de 1941 à 1944. Cette variation est due au remaniement de la distribution nécessité par les changements dans les catégories et le réarrangement des titres recommandés dans la Cinquième Revision de la Liste Internationale des Causes de Décès.

BIRTHS AND DEATHS AMONGST THE INDIAN POPULATION

APPENDICE I

NAISSANCES ET DÉCÈS DE LA POPULATION INDIENNE

APPENDIX I

BIRTHS AND DEATHS AMONGST THE INDIAN POPULATION

The totals of births, deaths and marriages presented in the general tables of the present report include returns for Indians, resembling in this respect the corresponding tables of previous reports. The births and deaths of Indians in Canada form only an inconsiderable portion of the whole but this is not so true of certain provinces considered individually. Moreover, in particular aspects of Vital Statistics, e.g., deaths from tuberculosis, the figures for Indians assume an importance beyond the numerical proportion of this class in the population. In the present volume, therefore, as in several previous, it has been thought well to supplement the general tables with an appendix containing the salient features of births and deaths of Indians. Not only will these tabulations enable a special study of the vital statistics of the Indian population, but they will also place the reader in a position to eliminate from the general tables the influence of Indian births or deaths.

Indian marriages cannot be separately tabulated since the racial origin of bride and groom is not given on the marriage certificate.

The term "Indian" as used in these tables includes half-breeds, whenever the statement of racial origin on the birth or death certificate allows their recognition.

The statistics for Indians cannot be considered as having the same degree of completeness as those for the white population. With regard to the accuracy of particular phases of the statistics such as ages, it is probable that in many cases the knowledge of the informants is vague. As to reported causes of death, a large proportion of these are from others than physicians.

APPENDICE I

NAISSANCES ET DÉCÈS DE LA POPULATION INDIENNE

Les totaux des naissances, décès et mariages dans les tableaux d'ensemble du présent rapport comprennent ceux des Indiens, comme dans les tableaux correspondants des rapports antérieurs. Les naissances et décès d'Indiens au Canada ne forment qu'une portion minime du total, mais il n'en est pas ainsi quand chaque province est considérée séparément. De plus, sous certains aspects des statistiques vitales, comme dans les décès causés par la tuberculose, les chiffres des Indiens prennent une importance dépassant la proportion numérique de cette classe dans la population. Dans le présent volume, il a été jugé opportun, comme dans les derniers rapports, d'ajouter aux tableaux d'ensemble de ce volume un appendice contenant les données principales sur les naissances et les décès d'Indiens. Non seulement ces tableaux permettent de faire une étude spéciale des statistiques vitales de la population indienne, mais ils mettent aussi le lecteur en état d'écarter des tableaux d'ensemble, l'influence que peuvent avoir les naissances et décès d'Indiens.

Il est impossible de calculer séparément les mariages d'Indiens, parce que l'origine raciale de l'époux et de l'épouse n'est pas donnée sur le certificat de mariage.

Le terme "Indien", dans ces tableaux comprend aussi les métis dans chaque cas où l'entrée de l'origine raciale sur le certificat de naissance ou de décès permet cette classification.

Les statistiques des Indiens ne peuvent pas être considérées comme aussi complètes que celles de la population blanche. Pour ce qui est de l'exactitude de certaines phases particulières des statistiques, comme l'âge par exemple, il est probable que, dans plusieurs cas, les connaissances de ceux fournissant l'information étaient plutôt vagues. Pour ce qui est des causes de décès, telles que données, il faut aussi se rappeler qu'une forte proportion de ces causes sont données par des personnes autres que des médecins.

VITAL STATISTICS OF YUKON AND THE NORTHWEST TERRITORIES

APPENDICE II

STATISTIQUES VITALES DU YUKON ET DES TERRITOIRES DU NORD-OUEST

APPENDIX II

VITAL STATISTICS OF YUKON AND NORTHWEST TERRITORIES

The births, deaths and marriages reported for Yukon Territory and the Northwest Territories of Canada for the year 1944 are listed in the following tables. The statistics of these territories are presented separately from those of the provinces. The population of the territories is so small that the omission of their births, deaths and marriages makes no material difference to the total for Canada. The inclusion of the territories with the remainder of Canada in the more detailed tables would also increase out of all proportion to the importance of the territories, the number of cases for which information under a given rubric was not available.

APPENDICE II

STATISTIQUES VITALES DU YUKON ET DES TERRITOIRES DU NORD-OUEST

Les naissances, décès et mariages constatés au Yukon et dans les Territoires du Nord-Ouest en 1944 sont énumérés dans les tableaux suivants. Les statistiques de ces territoires sont séparées de celles des provinces. La population des territoires est tellement infime que l'omission de leurs naissances, décès et mariages n'affecterait guère le total du Canada. L'inclusion de ces territoires avec les autres provinces du Canada dans les tableaux détaillés aurait comme conséquence d'augmenter, hors de toute proportion par rapport à l'importance des territoires, le nombre de cas non donnés sous une rubrique spécifique.
